

## CENTER FOR STUDIES IN DEMOGRAPHY AND ECOLOGY

### The CSDE Challenge 2005-2006

#### Research Grant Support at CSDE

- Assist with grant proposal development and submission
- Handle all aspects of budget planning, administration and reporting
- Assist in preparation of annual progress reports and final reports
- Establish and monitor subcontracts
- Make travel arrangements
- Research conceptualization and design
- Data and Power analyses
- Human Subject requirements and IRB application support
- Offer programming services for proposal development
- Provide programmers for hire on funded research projects
- Assist in developing effective computing strategies for research.
- Assist with literature searches
- Design and develop a website for your research project
- Provide promotional materials for your research activities

#### The Challenge:

### SUBMIT YOUR GRANTS THROUGH CSDE

#### Exceptional support

CSDE has considerable experience with the development and submission of successful grants (see sidebar).

#### Quarterly Prizes

Each quarter the names of the affiliates who submitted a grant during that quarter will be placed into a hat and one lucky affiliate will be selected to win \$500!

#### A Funded Research Assistantship

At the end of the academic year, the chair of the department that has submitted the most grants through CSDE will receive a funded research assistantship for one quarter during the following academic year!

#### All the revenue, none of the hassles!

The College of Arts and Sciences has a cost recovery program in place that ensures that all departments will receive their full share of research cost recovery funds for all grants administered through CSDE.
