

Society's Role in a Changing Environment

a Rabinowitz Speaker Series

Hosted by Program on the Environment and School of Marine and Environmental Affairs

Every first Tuesday (2nd Tuesday in Jan.) December 2017 – April 2018, **4:30 – 6 p.m.**

Program on the Environment, **Wallace Hall Commons**

DECEMBER 5: Joyce LeCompte

Joyce is an environmental anthropologist and a lecturer at Program on the Environment. Her research and talk will focus on the Coast Salish people and their relationships with the natural world.

JANUARY 9: Cleo Woelfle-Erskine

Cleo is an eco-hydrologist and an assistant professor at the School of Marine and Environmental Affairs. His research and talk will focus on ecological and social dimensions of human relations to rivers and their inhabitants.

FEBRUARY 6: Ken Jennings

Ken is an adjunct professor of environmental management at the University of Maryland with experience in government, industry and consulting. He has expertise in environmental compliance, sustainability and energy. His talk will focus on sustainable urbanization.

MARCH 6: P. Sean McDonald

Sean is a lecturer at the Program on the Environment and a research scientist. His research applies ecological principles to cultivate and conserve aquatic species. His talk will be on agents of change: invasive species, climate variability and ecosystem responses.

APRIL 3: Stephen Gardiner

Stephen is a professor in the Department of Philosophy and a Ben Rabinowitz Endowed Professor of Human Dimensions. His research and talk will focus on environmental ethics and human dimensions in a rapidly changing world.
