

About the International Institute for Population Science, Mumbai

The IIPS was established in 1956 jointly by the Government of India, United Nations and Sir Dorabji Tata Trust as Demographic Training Centre to serve as a regional centre for teaching, training and conducting research in the area of population studies for the ESCAP region. Even today, IIPS is the only recognized Deemed to be University of its kind in the world completely devoted to teaching and research on population-related areas. The Institute is under the auspices of the Ministry of Health and Family Welfare, Government of India.

IIPS offers six regular courses, namely, Diploma in Health Promotion Education (DHPE), Post-Graduate Diploma in Community Health Care (PGDCHC), M.A./ M.Sc. in Population Studies (two-year), M.Sc. in Biostatistics and Demography (two-year), Master of Population Studies (M.P.S.) (one-year), and Ph.D. The Institute also offers M.A in Population Studies through Distance Learning. The Institute conducts short-term courses from time-to-time for various International and national organizations on population and health issues.

About the Institute for Social and Economic Change (ISEC), Bengaluru

The ISEC is an All-India Institute for Interdisciplinary Research and Training in the Social Sciences, established in 1972 by the late Prof. V. K. R. V. Rao.

One of nine research centres at ISEC, the Population Research Centre (PRC) is an interdisciplinary community of scholars engaged in population research and training. The main financial support for the Centre comes from the Ministry of Health and Family Welfare (MoHFW), Government of India, New Delhi. The PRC is actively engaged in research relating to contemporary issues of demography and health in India. The centre offers a postgraduate (Ph.D.) training programme which emphasizes research using demographic tools and techniques grounded in population theory and knowledge.

ISEC, Bengaluru

About the Seminar

In the past 75 years, India has undergone a remarkable socio-economic and demographic transition. The long-standing national goal of replacement level fertility has been achieved and life expectancy has more than doubled, yet we face several socio-economic, demographic, and environmental challenges.

While commemorating 75 years of India's Independence, there is a need to introspect on the processes of demographic transition and their implications for future generations. Despite the fact that the discipline of demography has contributed significantly to public policies which address population related challenges, there is a need for further cross-disciplinary learning, innovative approaches, and expansion of the learning horizon to address current and future challenges. In this context, IIPS is organizing its twenty-seventh national seminar which will focus on the various drivers of population change centering on cross-cutting issues related to population, health, environment, and development.

The seminar is being organized jointly with the Institute for Social and Economic Change, Bengaluru as part of ISEC's Golden Jubilee celebrations during the year 2022-23.

Themes:

- **Fertility Transition**
- **Mortality and Health Transition**
- **Migration and Urbanization Transition**
- **Population Ageing**
- **Gender Dividend**
- **Marriage and Family Transition**
- **Environment and Livelihood**
- **Teaching and Research Methods**
- **Any other related themes**
