Re: UW Global Innovation Fund Tier 3 Partnership Award in-kind support

CSDE is pleased to pledge in-kind support for your Global Innovation Fund proposal,
Cross-Country Comparisons in Dating App Ecosystems

Contingent upon you receiving the Global Innovation Fund Tier 3 award, we can offer the following items:

- One month support for 50% FTE for Jessica Godwin, valued at \$5,519 in salary and benefits. Jessica brings expertise on several relevant methods and this time will allow her to oversee student analyses, and contribute to planning, presenting and writing.

Additional items that we can offer regardless of our additional funding are:

- Access to our terminal servers for you and your collaborators, which includes access to many useful software packages, including StataMP, Mplus, ATLAS.ti, and Adobe illustrator, as well as extensive, secure, shared, backed-up data storage
- Use of CSDE's instance of REDcap
- A commitment to organize mock panel reviews for any extramural grant applications you develop from this project

If the proposal is successful and the in-kind support is awarded, then it comes with the following additional requirements, which hold for all of our awards:

- Projects that involve human subjects research at any stage will be required to provide evidence of IRB approval for our annual NICHD project report, and complete additional forms on the nature of the human subjects work and sample. (These typically mimic the type of information required by IRB reviews in the first place).
- Applicants must provide a short final project report detailing (1) progress towards the stated objectives; (2) obstacles faced and how to overcome (if relevant); (3) details on any

proposals already submitted for extramural funding; and (4) plans for subsequent submission of proposals for extramural funding. This will be due three months after the end of the PHI award period.

- CSDE staff may choose to write a news article about each funded project in the CSDE e-news.
- All products generated by this effort should include acknowledgements of CSDE's support. Suggested language is: "Partial support for this research came from the University of Washington Center for Studies in Demography & Ecology, whose funders include a Eunice Kennedy Shriver National Institute of Child Health and Human Development research infrastructure grant (P2C HD042828) and multiple units at UW: the College of Arts & Sciences, Office of Research, eSciences Institute, Evans School of Public Policy, College of Built Environments, School of Public Health, Foster School of Business, and School of Social Work. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health."

Please inform us of the outcome of the application when it is available, and we can proceed from there.

Sincerely,

Anjum Hajat
Interim Development Core Director, CSDE
